20FT HIGH CUBE CONTAINER

Everything you love about the 20ft shipping container but with an additional 1 foot (30cm) of height for even more storage! It is strong, safe, secure, easy to transport and just that little bit taller compared with other shipping containers within our range.

Details

This is the high cube variant that is the more popular version of the 20ft container. Why? Because the extra 1 foot in height provides a significant increase in storage without impacting the container footprint.

Built from weathering carbon steel, our 20ft shipping containers are strong, secure, weatherproof units that safely protect everything inside. Their simple design makes them one of the most versatile transportable storage solutions available today.

They are commonly used for a wide range of applications including onsite storage of furniture, equipment, parts or excess stock. Perfect as a makeshift shed or workshop with workbenches, shelves and power or for transporting goods between locations on road or rail.

Key Features

- Extra ceiling height
- Wind and watertight
- Pest and vermin proof
- Wooden floors
- Secure and lockable via our lockbox system
- Lashing points at the floor and ceiling to secure your goods
- Size ~6.1m L x 2.5m W x 2.9m H
