40FT COOL ROOM

SCF's 40ft Cool Room shipping container is purpose built as a safe and reliable storage solution for temperature sensitive goods. Machinery run time, electricity use and costs are minimised by intelligent insulation design. Numerous safety features and huge storage capacity make this your perfect large-scale fail-safe refrigeration remedy.

Details

Just like SCF's 20ft Cool Room, the larger 40ft alternative is designed with premium thermal technology paired with greater storage capacity and a raft of safety features.

If you need a large scale refrigerated storage solution for on site events, festivals, or outdoor catering functions, look no further than the feature-packed 40ft refrigerated container.

The sometimes challenging kiwi climate is no match for the 40ft refrigerated container, made with high quality materials and tested in harsh conditions, you can rest easy that your temperature-sensitive stock is safe and secure.

Key safety features include internal emergency escape release handles and an illuminated safety sign at the exit door. It also comes with an emergency siren that can be activated from inside the container.

Key Features

- 2 pallet wide
- Superior temperature control and insulation
- Emergency siren
- Internal release emergency door
- Forklift pockets

Options

- Airflow or flat floor
- Ramp
