SOLUTIONS

8FT SHIPPING CONTAINER

The 8ft Shipping Container is the smallest option in our range. Ideal for small storage requirements, sites with limited access or limited space to store a container. Just like the larger versions, they are safe, secure and watertight.

Details

Built from weathering carbon steel, our 8ft shipping containers are the smallest container option. Like all our other models, they are strong, secure, weatherproof units that safely protect everything inside. Their simple design makes them one of the most versatile transportable storage solutions available today.

The 8ft version is commonly used for a wide range of applications including onsite storage of furniture, office documents, equipment, parts or excess stock. Perfect for transporting goods between locations on road.

Key Features

- Wind and watertight
- Pest and vermin proof
- Wooden floors
- Secure and lockable via our lockbox
- Lashing points at the floor and ceiling to secure your goods
- Available in various sizes

Options

- Transport/Shipping Certifications
- Variety of Container Grades available - New or Used
- Ask us about Container modifications including shelving, power and lighting
