20FT BULK LIQUID TANK

SCF's 20ft Bulk Liquid Tank is suited to both small and large scale projects. The small footprint of these units the ultimate flexibility on all sites, where space is often at a premium.

Details

Bigger isn't always better. SCF's 20ft Bulk Liquid Tank can hold up to 32,000L on site.

These tanks are suited to space constraints because they're stackable, and can be connected in a farm configuration to increase storage capacity without increasing footprint.

The versatility of the unit allows for multiple applications including water treatment and chemical storage. The forklift pockets make relocating the unit simple and adds flexibility to your site.

All units are fitted with level gauges which allow customers to monitor the filling ratio while units are in use. Skid mounted for fast, cost-effective mobilisation, these tanks are a versatile solution for onsite liquid storage.

Key Features

- High volume breather valve with a secondary overflow
- 4 inch butterfly valve with bauer coupling
- Stair and gantry system for safety

Options

- Internal mixing lines
- Galvanised steel
